An Independent Judiciary

Criticism of the Democratic organization in Ulster County for its failure to endorse Judge Hasbrouck for re-election to the office of Justice of the Supreme Court seems to have been the principal tenor of his speech accepting his nomination.

He then said: "But where a Judge has devoted himself for the long term of fourteen years to the service the question arises as to whether he should be called upon to re-enter the political arena in order to hold fast to his livelihood and his office."

The question of livelihood is not involved in this campaign, nor does the office of Supreme Court Justice fall to any individual as a matter of right.

In the matter of endorsements for this high office, there does not appear to have been any endorsements of Democratic candidates for more than a generation past. In this, the Third Judicial District of the State of New York, comprising the counties of Albany, Rensselaer, Columbia, Greene, Schoharie, Sullivan and Ulster, there are seven Supreme Court Justices and all of them are Republicans.

It is a well known fact that long before the expiration of the term of Justice James A. Betts, the last Democratic Supreme Court Justice elected in this district, Justice Hasbrouck was engaged in a bitter contest to obtain the Republican nomination to the office of Justice of the Supreme Court.

In 1925, Judge James V. Coffey had been appointed Justice of the Supreme Court and had served as such in various counties in this district and had given unusual evidence of his high qualifications to fill that position. He was unanimously re-nominated in the fall of that year, by the Democratic party. And, although he had the almost unanimous endorsement of the lawyers of Rensselaer county, where he resided, the Republican organization refused such endorsement and nominated a candidate against him.

Judge Hasbrouck in his address also said: "The Supreme Court is the greatest of the state courts. Its power comprehends the lives, liberty and property of the citizens. Under a conviction for murder in the first degree, life must be declared forfeit; under a conviction of felony the citizen can be deprived of his liberty. By its decree the citizen can be divested of his goods, chattels or lands."

If the judiciary is to be kept out of politics, why limit its application to the Supreme Court? Is not the County Court a very important part of the judicial system of this state? It has jurisdiction to inflict the death penalty, to sentence a felon to state prison, and by its decree to divest the citizen of his "goods, chattels or lands."

Judge James Jenkins was County Judge of Ulster county from 1912 to 1918. He had been elected on the Democratic ticket and had given efficient and capable service and earned the reputation of being an able, honest and competent judge. Upon the expiration of his term no endorsement by the Republican organization of Ulster county was tendered Judge Jenkins, but, on the contrary, a Republican candidate was nominated against him.

If there has been any departure from the practice of endorsing judges in this county, Judge Hasbrouck can find the answer to his question in the case of Judge Jenkins above cited.

A non-partisan judiciary is one of the fundamental ideas of our judicial system and, as originally instituted, intended to include representatives of both of the great parties.

That is true to this day in the United States Supreme Court and the Court of Appeals of this state, but in the Third Judicial District all of the Supreme Court Justices are Republicans. The large population of this district is almost equally divided between Republicans and Democrats as shown by the vote at the last judicial election, and the Democratic party should be entitled to at least one representative in the judiciary of this district.

In his speech accepting the nomination, Judge Hasbrouck said: "Is the judgeship to be made the football of politics?"

Is leaving with the people of this judicial district the choice of a Justice of the Supreme Court in accordance with the expressed provision of the Constitution of this state, making this exalted office "the football of politics?"

The delegates to the Democratic Judicial Convention were elected by the people to nominate a Justice of the Supreme Court. These delegates met in convention and unanimously handed back to the people of the district the name of Judge Van Ethen for such office. This was done by the delegates in convention and not by the Democratic organization of Ulster county or any other county in this district.

There was little need of amending the Constitution and limiting the term of office of Justices of the Supreme Court, if once a Justice is elected he must be endorsed by both parties and continued in office until he resigns, reaches the age limit or dies.

BIG GAME ROOMS ALASKAN WILDS

Giant Moose, Huge Brown Bears and White Mountain Sheep Abound.

Washington.—Most American sports men know that Alaska has a vast wilderness area in which exist great numbers of some of the most picturesque and interesting game animals of this continent, says Dr. E. W. Nelson, in a recent bulletin of the American Game Protective association. The most notable of these are the giant moose, the greatest living representative of the deer tribe in the world. The huge brown bears of Kodiak Island and the Alaska peninsula, the greatest of living carnivores, are the survivors of a line of huge bears which once inhabited western North America. Skulls from the asphalt deposits of southern California show that even the gigantic Kodiak bear was far exceeded in size by the bears of that region in the long ago, says Doctor Nelson.

The white mountain sheep of Alaska's mountain ranges are among the most beautiful of their kind. Their nearest relatives are mountain sheep found throughout Kamchatka and eastern Siberia. Several races of caribou also inhabit Alaska. Formerly they existed in vast herds over much of the territory, but they have been exterminated in some areas and greatly reduced in numbers of others, although large herds still occupy the region between Fairbanks and the coast of the upper Yukon river.

Meat Value of Game \$1,000,000.

In addition to its large game Alaska is the breeding place every spring of vast numbers of migratory wild fowl which come to the States to spend the fall and winter. With its game resources the territory also has rich resources in land fur-bearing animals, the gross income from which amounts to about \$2,000,000 a year. The gross value of the game taken each year in Alaska by the native and white population probably has a meat value closely approximating \$1,000,000.

"For a long time after purchase of Alaska from Russia no effort was made to safeguard its wild life resources," writes Doctor Nelson. "In 1902, however, the first general game law applying to the territory was passed by congress. As a result, after my visit to the territory in 1920 to establish the feasibility of experimental work of the biological survey I undertook the preparation of a new Alaskan game and fur law. This bill was sponsored by Alaska's delegate, Dan Sutherland, enacted and signed by the President in 1925.

"Alaska contains a vast area of wild country which will remain a wilderness far into the distant future, and among the main resources of such areas will continue to be the game and fur-bearers which they support.

"One gratifying development under the new act has been co-operative arrangements with the game authorities of British Columbia and Yukon territory providing for the same seasons, especially on fur-bearers, on both sides of the boundary. In addition joint patrols of the boundary have already been instituted with gratifying effect in putting out of business some law violators who have been located along the line in order that their transgressions might be concealed by moving back and forth over the boundary.

"So far as can be judged in the short time since the new law became effective its reception by the people of the territory and its operations have been very promising for its effective influence in the conservation of Alaska's wild life.

Caribou and Bears Threatened.

"The biological survey has turned over to the commission a sea-going patrol boat, the Sea Otter, 47 feet in length, for patrolling the coasts of the mainland and islands of southeastern Alaska. Within its territory these coast lines aggregate a total of about 18,000 miles. Plans are being drawn for a power cruiser 68 feet in length, to be equipped with a full Diesel engine, for use in patrolling the islands of the southern coast of Alaska from Cook Inlet to the westward, the Alaska peninsula and the Aleutian Islands. This great area has hitherto been without any game or fur law enforcement.

"The caribou on the Alaska peninsula have been reduced to a point that seriously endangers their existence and the persistent hunting of brown bears on the peninsula has also greatly reduced the numbers of these interesting animals in parts of that area. Inroads have also been made on the brown bears and caribou on Unimak Island, the easternmost of the Aleutian Islands reservation. In many areas the winter poisoning of fur-bearers has also been a common practice, with disastrous consequences to the fur supply.

"One of the most gratifying results from the administration of the new law has been the willingness of the Alaskan courts to punish offenders by the confiscation of guns and the imposition of substantial fines and in flagrant cases of jail sentences. One of the useful restrictions in the new law is that forbidding the possession of firearms by aliens without a special permit. Many offenders against the game and fur laws in the past in Alaska have been among the class of residents, and the rapid confiscation of their guns, which is now taking

Sure Relief BELLANS FOR INDIGESTION

25c and 75c Pkgs. Sold Everywhere

place, will unquestionably be most beneficial to the wild life. "The Alaska legislature, at its spring session of 1925, appropriated \$10,000 to be used by the game commission in restocking with game and fur-bearers areas suitable for species not already there or which have become extinct. Deer have already been introduced on Kodiak Island and snowshoe rabbits from Washington have been placed on islands in southeastern Alaska. Further distribution of deer will be made, possibly the Olympic elk will be tried in certain localities, mountain goats have been placed on at least one island, and beaver, muskrat, mink and marten will be introduced on islands where they do not occur. The areas involved are so great in the aggregate that these stocking experiments carry the possibility of a very material increase in the game and fur output of the territory."

Deer Saved From Starvation.

During the early winter of 1925 Doctor Nelson relates an extraordinary heavy snowfall forced deer to the beaches, where they were trying to subsist on kelp exposed by low tides and were starving. A fund of \$2,000 was raised and sent to the warden in charge at Juneau. Hay was purchased and arrangements made through the patrol boat of the biological survey and through the co-operation of the forest service and the bureau of fisheries and with the people of southeastern Alaska to distribute it and to cut down spruce trees on a considerable scale so that the deer could feed on their foliage. A number of contributions of money and hay were also made by the people of the region, and the combined result of the efforts was to save a very large number of deer from starvation.

The biological survey in the spring of 1924 organized a co-operative expedition, with Herbert W. Brandt of Cleveland and H. B. Conover of the Field Museum of Chicago, to study the breeding of wild fowl in the great marsh country south of the delta of the Yukon. A part of the work there was the banding of a considerable number of birds, including about 140 geese. Forty of these bands from geese killed during their southward flight the following autumn were returned to Washington. The first of these geese was taken on the Alaskan peninsula, the next on Queen Charlotte Islands and others down the coast of Washington, Oregon and in California.

Sign's Wires Cross, Advertisers Slandered

Asbury Park, N. J.—An electric sign in the throes of what seemed to be a nervous breakdown got its wires crossed and with slanderous statements concerning the firms it was supposed to advertise kept a crowd on the boardwalk laughing for two hours.

Ordinarily it proclaims the virtues of some twenty-five business houses in three 40-foot lines, devoting twenty seconds to each firm before passing on to the next. That is, it did until the monotony began to tell and time and reason was suddenly flung to the winds with the following: (Name of a well-known restaurant). "Dyeing Establishment."

It blinked, then glared down with this indifference to consequences: (Name of a bus line). "Withered Foot-Release."

It winked solemnly and said: (Name of a department store). "No Cover Charge."

It batted its eyes and glared insanely at the crowd: (Name of an exclusive grill room). "Beauty Shoppe in Full Operation."

For two hours it gibbered innumerable kilowatts of nonsense, then an electrician came as keeper and choked it off. But not before it declared unequivocally that a certain laundry produced "Clean Sports."

Tragedy of the Desert Shown in Savant's Find

Philadelphia.—A grim little morsel of a tragedy of the desert has been brought back to the University of Pennsylvania by Prof. John W. Harshberger of the botany department, who has just returned from a trip through the West. It consists of the dried and mummified body of a horned toad, entangled among the curved spines of a small cactus.

The skin of the luckless little animal was not punctured in any place, but its hind legs were fettered by the fishhook-shaped thorns, and it had apparently died a slow death of hunger and thirst. The cactus appears to be much tougher than its animal victim, for though it had been torn from its roots for several weeks it showed no signs of distress, and Professor Harshberger stated that such plants are able to live without a drop of water for several years, lying on a laboratory shelf.

Look at Exhibition

A jar's nest, with three eggs, was found behind a stand prior to the opening of the Essex (England) agricultural exhibition.

The bird was not collected, but gained free access to the nest through a wire device, thoughtfully fixed by bird lovers. Although thousands of visitors came in close proximity, the bird sat undisturbed on the nest till the eggs were hatched.

You can't separate me and Peter Schuyler

I hunted around—sampled this cigar and that—and then I met Peter Schuyler Perfecto. Now my hunting days are over. I've settled down to solid smoke-satisfaction.

Ever so often, some well-meaning tipster recommends a change:

"Try Defector—they're bargains—half-an-inch longer—and exactly the same price."

How often have I followed these tips? Not once!

Because these are certain things I want in a smoke—fragrance, mellowness, flavor, all-round quality. In other words, I like Havana tobacco—the kind they've been rolling into Peter Schuyler Perfecto for forty years.

And I stick to Peter Schuyler Perfecto. I'm satisfied that they're the best run for my money—as large in size as the cost of their fine Havana filler permits.

What—you've never smoked one! Man, you don't know the pleasure that's in store for you. Try Peter Schuyler Perfecto tonight.

Four distinct models of
Custom-built Coaches

Six color options

5-passenger, 2-door . . . \$2995
5-passenger, 4-door . . . 3250
7-passenger, 4-door . . . 3350
7-pass., 4-door Limousine 3450

at Buffalo—our excise tax additional—terms if desired

Perhaps you do not realize that today you can buy an easy-riding, 130-inch wheelbase, Pierce-Arrow enclosed car—its staunch body entirely hand-built by Pierce-Arrow craftsmen—with your choice of six rich color combinations—beautifully finished, appointed and upholstered in the distinctive Pierce-Arrow way—complete with Pierce-Arrow four-wheel brakes, balloon tires and Houdaille shock absorbers—for as little as \$2995. So, for these and many other important reasons, you certainly should see what Pierce-Arrow gives you in the Series 80 custom-built coach line as compared with what you have in your present car. A demonstration trip is available, starting from your address or ours.

The coach model illustrated is the custom-built seven-passenger convertible limousine, priced

\$3450

at Buffalo—our excise tax additional

The economical Series 80 coaches powered by its Pierce-Arrow built six-cylinder, 70-horsepower engine get 14 to 17 miles per gallon out of gasoline—17,000 to 18,000 miles out of tires. Mechanical attention, nearly model, costs little due to national Pierce-Arrow Flat Rate Service.

KINGSTON, N. Y., OCT. 13, 1926.

Governor Smith is resorting to calling names. He calls Mr. Mills the "Past Exalted Ruler of half bakers." The expression is unfortunate. It is not a complimentary connection in which to describe the providing officer of an Elks Lodge and rather shows that the Governor is losing his head. When a candidate gets down to calling names he is going wrong.

St. Louis celebrated the victory of the Cardinals so violently and enthusiastically that two boys were killed and a number of persons injured. From this we should derive a great moral lesson. The celebration caused the deaths. Baseball caused the celebration. Therefore, let us at once prohibit baseball. This is in line with the reasoning of the prohibitionists, who are infallible and holy in every way and against whose words and works it is treason and sacrilege to speak or even think.

THE PARKING PROBLEM

The automobile parking problem grows more serious. The Board of Public Works plan to simplify regulations has done no harm and little good. It has avoided punishment for technical violations of the rules, and to that extent is a success. But it has not solved the problem.

There is one simple solution which can be brought about by voluntary action of the business and professional men of Kingston. That is, to refrain from using the street as a storage place for their own cars and the cars of their employees. No matter how many parking places there are, streets will be congested so long as business men use the space in front of their own stores and offices as storage room for their cars while they are at work or business.

Intelligent selfishness will settle the whole matter. Let the home folks who ride to their places of business use the parking places and leave the streets for customers to park their cars in. Many a sale is lost because a potential customer is unable to park his car in front of or near the store he prefers to patronize. Intelligent self interest on the part of the business man will, if applied, lead him to cease blockading his own store with his own cars, thereby driving away trade. It is not hospitable, polite, or good business to drive customers to the inconvenience of seeking out a remote parking place in order that the business man and his clerks may save themselves a few steps of exercise morning, noon and night, that would do them good.

The buyer, especially from outside the city, wants to go from store to store, make his purchases and place the packages in his car. He could do this and Kingston would shine as a wonderfully fine place in which to buy if the curb parking were left clear for customers instead of being hogged for the storage of cars. If intelligent self interest and common politeness to customers are not a sufficient incentive to bring this about it should be brought about by force of law.

MILLS THE MAN.

Ogden L. Mills, Republican candidate for governor, might have lived a life of luxury and idleness, might have spent much of his life in palatial yachts on the Mediterranean or in the European capitals instead of taking an interest in his country and its civic welfare.

Mr. Mills looks the electorate directly in the face and says he was born at 2 West 59th street, New York. He admits he inherited a great fortune, but declares that in spite of that he was determined to be useful through struggle and effort. When he was seventeen he was in Harvard. He was graduated in two years and for three years following he was in the Harvard law school. Later he engaged in the active practice of law, but during this time he was laying the foundation for a political career.

Politically, he began at the lowest rung of the ladder. He became a worker at the polls in the district in which he still lives. Difficult though it is, to prevail upon workers to canvass districts. Ogden Mills volunteered readily for this task and for several years he went from

house to house ringing door bells all day and far into the night. He had determined to be useful and he shrank from no job which faced him, however humble or humiliating.

Having earned the confidence of Republicans in his district he was named for representative in Congress but was defeated. This didn't change his purpose, since he had determined to be useful to his city, his state and his country. Later he was the Republican candidate for Senator in his district and was elected by a large majority. After that he went to Congress. Then came the war and, following his original practice of being useful, he sought to participate. It is perhaps sufficient to say that Mr. Mills was rejected because of his eyes, but he persisted and when the war ended he was in the Argonne with the Sixth Division.

Through his work in his party, and through his legislative experience Mr. Mills has equipped himself for the governorship. As a worker at the polls, as a member of the state senate, and as a member of the Sixth Division in the Argonne he has carried out his theory of usefulness and has rendered distinguished and intelligent service. If he is elected governor he says "I won't try to be a great governor at the expense of the state's legislative body." If elected governor Mr. Mills will continue to follow his plan of making himself as useful as possible to all of the people of the State of New York.

That Body of Yours

By James W. Barton, M. D.

(Registered in accordance with the Copyright Act)

POSSIBLE CAUSES OF PERILOUS ANAEMIA.

Physicians of the entire world are endeavoring to discover the cause of pernicious anaemia. It is a source of some satisfaction to be able to keep these patients alive, sometimes for years, by means of blood transfusions, but there is never that feeling of safety that would mean so much to the patient and physician.

In this type of anaemia there is a loss from the blood of both the number and quality of red blood corpuscles.

That shock often has much to do with this type of anaemia is admitted, just as we know that shock or some emotional disturbance can cause trouble elsewhere in the body. During the war there was an increase in pernicious anaemia and it was then thought to be due to nervous strain.

A British physician has been telling his brethren that some of his cases are undoubtedly due to a poisoning of the intestine, due to slowing up, or almost a stoppage of the bowel. The poison resulting from this actually entered into the blood and caused its destruction. That it was not due to any mechanical obstruction, such as a growth, was proven by the fact that an operation removing the growth did not prevent the poisoning of the blood, and the pernicious anaemia continued.

Now the thought that must occur to you and me is, that during any mental strain there is bound to be some interference with the natural impulses of the entire intestinal tract.

The natural juices will not flow so freely because the brain will not be entering into the matter of appetite. Then the impulses which should go to the muscular coats of the intestine will be irregular or spasmodic, as the nervous strain or shock is expending the whole nervous force of the individual. This means a stasis or stoppage of the material passing through intestine. Putrefaction follows, poisoning of the blood, causing it to lose its red corpuscles which are its very life.

It would be well for all of us whenever under any strain to watch our eating and daily habits of life. Regular hours for eating, rest periods before and after meals, sufficient outdoor exercise, will stimulate the natural impulses of stomach and intestine and there will thus be no stasis or stoppage to poison the blood.

TWENTY AND TEN YEARS AGO.

Today's Story in New York History

By Frederic A. Goddard.

(Copyright, 1926, by the Author)

American Fleet Under Commodore Arnold, Suffers Second Defeat on Lake Champlain, October 13, 1776.

The American people were disheartened by successive defeats from the outbreak of the Revolutionary War to the battle of Long Island, including the evacuation of New York on the night of August 23-30, 1776. The Provincial Congress of New York, driven from the city, became migratory.

The British army was in full possession of New York city and Manhattan Island. Other important events were also occurring in Northern New York near the borders of Canada.

A large British and German force were in the latter province under the general command of Sir John Burgoyne, and were united with troops under General Guy Carleton, the Governor of Canada, in preparation for a movement which contemplated the severance of New England from the other colonies.

Knowledge of this design gave the Continental Congress and their constituents great anxiety, and in June, 1776, Congress sent General Horatio Gates to take charge of the Republican army in Canada, independent of General Philip Schuyler's command.

When Gates arrived in Albany he learned that the army was already out of Canada, and that the remnant of it was at Crown Point.

It was learned that Carleton had appeared at the foot of Lake Champlain with a well-appointed force of 13,000 men. Only on the bosom of the lake could they advance, for there was no road on either shore.

Gates hastened to Crown Point, took command of the remnant of the army, and proceeded to construct a flotilla of armed vessels to oppose the advance of the British. General Benedict Arnold was appointed commander-in-chief of this flotilla, and by the middle of August, 1776, ten vessels large and small, were ready for service. Meanwhile the British were quite as busy in the construction of an armed flotilla at St. Johns, on the St. Lawrence.

Toward the close of August the impatient and impetuous Arnold was permitted to go down the lake to watch the foe, but instructed not to go beyond the present location of Rouse's Point, on the boundary line between Canada and New York.

Arnold soon found himself in a perilous position and fell back some distance to Valcour Island, where in the course of a few weeks his flotilla was increased, and early in October he was in command of quite a formidable fleet, mounting sixty-seven cannon and ninety-four mortars, and manned by about five hundred men.

Ignorant of the strength of the enemy fleet, and unwilling to meet a superior force on the broad lake, Arnold committed the foolish blunder of arranging his vessels in a line across a comparatively narrow channel between Valcour Island and the western shore of the lake, a few miles below Plattsburg. His flagship was the schooner "Royal Savage," twelve guns.

Carleton advanced, with Edward Pringle as commodore, and on the morning of October 11, gained an advantageous position near Arnold's vessels. A very severe battle ensued. In which the "Royal Savage" was first crippled and afterwards destroyed.

Arnold behaved with the greatest bravery during a fight of five hours, until it was closed by the falling night, when in the darkness he escaped with his vessels and pushed up the lake.

The astonished enemy gave chase the next morning, but did not overtake Arnold until the morning of the 13th. Then another desperate fight was waged which continued for five hours.

The American vessel "Washington" was run on shore and burned, and the "General Waterbury" and her crew were made prisoners. Arnold was on the "Congress" and when she became shattered almost to a wreck he ran her ashore, with other vessels, a few miles below Crown Point, set them all on fire, and escaped.

Then he and his little force made their way through the woods to a place opposite Crown Point, set them all on fire, and escaped. Then he and his little force made their way through the woods to a place opposite Crown Point, just avoiding an Indian ambush, and escaped to the fort whence he started in safety.

All that remained of his proud little fleet were two schooners, two galleys, one sloop and one gondola. In the two actions the Americans lost ninety men; the British not half that number.

Carleton took possession of Crown Point, but abandoned it in twenty days and returned to Canada.

CITY TREASURER'S OFFICE
 Special Assessment.

Notice is hereby given that I have received the warrant for collection of the special assessment of 75 per cent of the expense incurred in the construction of a Storm Water Sewer in Gage Street, beginning at a point four hundred sixty feet east of Foxhall Avenue, thence in a westerly direction through Gage Street to Foxhall Avenue and through Foxhall Avenue to a connection with the existing sewer in O'Neill Street.

The same has been left with me for collection at my office in the City Hall, in and City, that for thirty days from the date of this notice the said assessment may be paid without additional fees or charges, and that for the twenty succeeding days thereafter, with five per centum fees thereon and one dollar for such notice as required by the City Charter.

Dated at the Treasurer's Office, City of Kingston, N. Y., October 9, 1926.

WILLIAM C. DE WITT,
 City Treasurer.

NOTICE TO CREDITORS—In pursuance of an order of Hon. George F. Kaufman, Surrogate of Ulster County, notice is hereby given, according to law, to all persons having claims against Vincent Barth, late of the City of Kingston, County of Ulster, deceased, testate, to present the same with the vouchers in support thereof, to the undersigned, Nicholas Stock, the Administrator of the estate of said deceased, at the office of Walter N. Gill, No. 3 East Strand, in the said City of Kingston, on or before the first day of December, 1926.

Dated, May 20, 1926.

NICHOLAS STOCK,
 Administrator.

PRONG-HORN ANTELOPES

"We're delicate, but we can't help it," said Mother Prong-Horn Antelope. "The children are delicate too. It is hard for them to grow up into strong antelopes."

"It is hard for all of us when the weather gets cold for we don't like it. Here in the zoo we are sheltered, but when we used to be free, oh, how worn out we used to get trying to fight the blizzards and snow storms and winter winds."

"Tell us more about our family history," said the young antelopes.

"Even though we are delicate but we are not so feeble in our minds but what we want to hear stories and interesting adventures."

"We are interested in things, and especially in hearing about the ways of prong-horned antelopes."

"I will tell you," said Mother Prong-Horn Antelope. "Though I haven't time to tell all of the story now."

"Some time later on I will tell more."

"Let us hear all we can now," begged the young antelopes.

Mother Prong-Horn Antelope began: "Our horns are hollow," she said.

"That is interesting and different."

"We shed these hollow horns every year. Never do we let a year go by without doing this."

"We have not only hollow horns though, but we have pronged hollow horns."

"We could be called Hollow Prong-Horn Antelopes, though it would be a bit too long for a convenient and easy name."

"We're the only animals, I believe, to have these prongs with hollow horns."

"We're becoming rare and scarce. We're becoming an interesting and unusual family."

"We come from the Rocky mountains and some of us come from the

It is So Lovely Here.

wonderful plains where the grass made such good, nice food.

"Sometimes some of our family lived where there were deserts and no water, and we puzzled all those who came to the deserts and saw us."

"They wondered how we, as a family, could live in so many different kinds of places."

"So children, you belong to a very fine, a very interesting and a very strange family."

"Ah, Mother Prong-Horn Antelope," said the children, "it is good to hear that we are interesting."

"Then we will be appreciated in the zoo, and it is well to be appreciated and liked where we are, isn't it?"

And Mother Prong-Horn Antelope nodded her pretty head.

"We do not have to worry about the cold now, nor even do we have to have our shelter, for this is the glorious summer time and it is so lovely here."

"The trees are so green and their shady branches are so lovely."

"The sunlight streams through the trees but not so much as to get us too hot."

"It is just right."

"The breezes come whispering through the trees and they play with the sunlight."

"Then we feel well and not so delicate as we do when the winter time comes."

"But that is all I can tell you this time. Another time perhaps I will tell you more of our family and of the different places where they lived and of their ways."

"I will tell in and tell you more little facts and points but now we must rest."

"Yes, we must rest and feel the pleasant breeze and the sunlight through the shady, restful trees."

"We are glad to have heard what we did," the little antelopes said.

RIDDLES

What asks no questions but requires many answers? A doorbell.

What is the difference between a donkey and a postage stamp? One you lick with a stick; the other you stick with a lick.

What is an old lady in the middle of the river like? Like to be drowned.

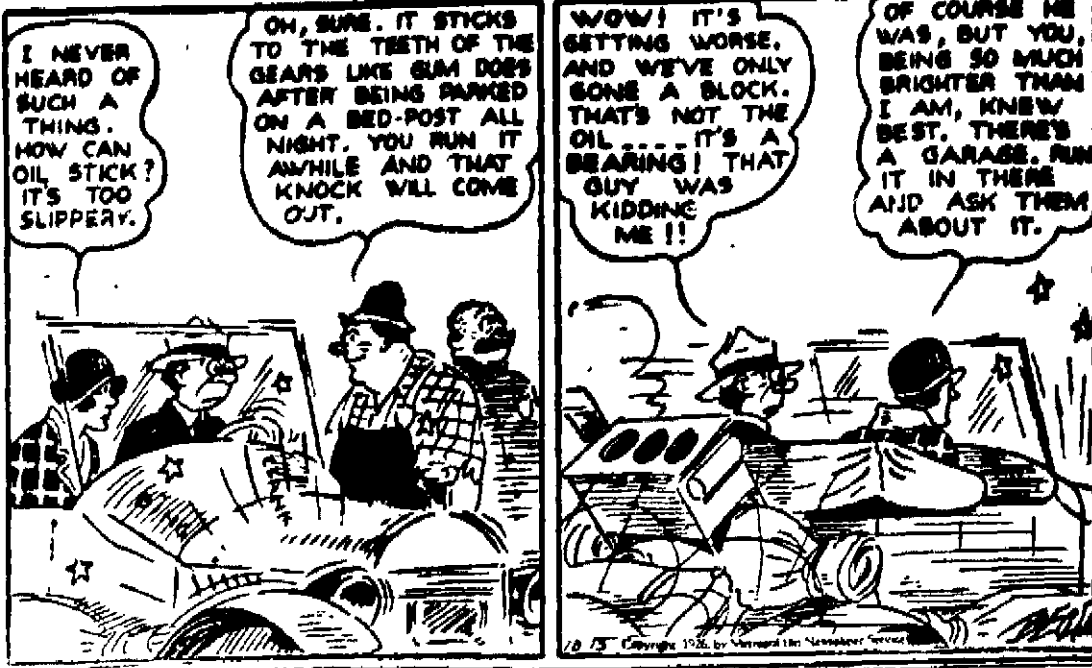

Why are ducks no longer imported into this country from England? Because a Yankee duck don't do (Yankee ducks don't).

What is an even-droppert? The tide.

What would give a blind man the greatest delight? Light.

GAS BUGGIES or HEM AND AMY—Slippery Business.

OFFICE CAT

By JUNIOR

"There are only five things in this world that I want. And you can give them to me."

"Ah, and what are they?"

"Five dollars."

China will not be able to cut much of a figure in the world until she begins to have a servant problem.

A time will come when our presidents, senators, and captains of industry will say, with tears in their eyes: "All that I am, I owe to my husband."

The girls will wear anything, or nothing, whichever happens to be the style.

"That's that," said the optimistic dog after the train had cut his tail off. "Now I won't be bothered with any more tin cans."

There are not enough front seats in the opera houses and not enough back ones in the churches.

There, little Stumble, don't you cry; You'll be a Dance Step by and by.

Bobby (boasting): My sister's got a diamond ring.

Billy: Huh, mine's got two lawyers, ten letters and a detective.

One can't always say what he wants to in the paper for the linotype may take a notion to say it differently.

"You don't need to open your mouth so wide," said the dentist. "I'm going to stand right here on the floor."

Garden crops may need rain but the weeds never seem to.

Pity but what some genius would invent a follow-up letter to wedding invitations that would make delinquents kick in.

When a father dies his children pray for him. When a father dies and leaves a conspicuous legacy, his children pray for another like him.

Nick: "What's the way to the nearest bank?"

Dick: "Don't ask me; I'm not a bank director."

What has become of the "poor working-man?"

Birds of a feather flock together and if you think you see a buzzard running with chickens you're mistaken, they're all buzzards.

"Josh," said Farmer Hiram to his son, "why don't you go ahead and write a play?"

"Who? Me?"

"Yes, I've been to theatres quite some lately. The way I heard you talkin' to that team o' mules shows me you've got some pretty good ideas for dramatic dialogue."

In love scenes the man used to be pictured on his bent knee, but instead nowadays the girl is pictured on his bent knee.

Five babies are born every minute in the United States, but according to Barnum's estimate, only one is a sucker.

Farmer Gray entered the room where his son was smoking a Chester-Strike cigaret. He sniffed the air once, turned around and started out again snuffling. "That reminds me, I forgot to feed the horse."

Obe that impulse—quit your foolishness.

Regard an Ad Writer

Regard, the famous British artist and caricaturist, was one of the best advertisement writers. Before the days of newspapers the enterprising shopkeepers used hand-drawn or trade-mark's cards which bore the name of the shopkeeper and carried wording or pictures to describe his business.

A collection of these old trade-mark's cards has been found to have been drawn by Regard.

Encourage Mouth Cleanliness

Children love the cool taste of healthful cleanliness afforded by Wrigley's Chewing Sweets.

And with Wrigley's they acquire a splendid system or practice of mouth hygiene.

It removes the bits of food which would ferment and injure the teeth.

It stimulates the digestive juices, thus aiding the stomach and general health.

Wrigley's is good for you, too!

NOTICE OF GENERAL ELECTION.

Pursuant to the provisions of Section 8 of the Election Law, Notice is hereby given that a General Election will be held throughout the County of Ulster on Tuesday, November 2, 1926.

That the public officers to be voted for within said county, at said General Election, are as follows, to wit:

A Governor, in the place of Alfred E. Smith.

A Lieutenant-Governor, in the place of Seymour Lawson.

A Comptroller, in the place of Vincent B. Murphy.

An Attorney-General, in the place of Albert Ottinger.

A Chief Judge of the Court of Appeals, in the place of Frank H. Hiscock.

An Associate Justice of the Court of Appeals, in the place of Chester B. McLaughlin.

A United States Senator, in the place of James M. Wadsworth, Jr.

One Justice of the Supreme Court, for the 2nd Judicial District, in the place of Gilbert B. Harbo.

A Representative in Congress for the 27th Congressional District, in the place of Harcourt J. Pratt.

A Senator for the 26th Senate District, in the place of Arthur F. Houston.

A Member of Assembly in the place of Mildred Davis.

A Surrogate, in the place of George F. Kaufman.

A Sheriff, in the place of Herman S. Wells.

A Superintendent of the Poor, in the place of Lester L. Segendorf.

A Coroner, in the place of Howard R. Hamilton.

All whose terms of office will expire on the last day of December next.

Notice is further given that there will be submitted to the qualified voters of said county at said General Election, a question to be designated Question Number One, as follows:

Should the Congress of the United States modify the federal act to force the high courts to determine in accordance with the provisions of the respective states, and that any voter may obtain a copy of said question upon application to the Board of Elections.

Given under the hands of the Commissioners of Election and the Clerk of the County of Ulster, this 13th day of October, 1926.

JOHN A. ROCK.

Commissioner of Election.

Years Ahead!

GAROD ELECTRIC POWER RADIO

Ushers in New POWER-ERA of Radio Reception!

Electric POWER captures New Range and Wealth of Tone
—the low fundamental tones that demand power to reproduce... the delicate, difficult overtones, too!

Most radio tone is "thin" and distorted because the receiver lacks the power units that reach down low enough for the "fundamental" notes. Bass notes are the foundation of musical tone. Now, Electric POWER enriches and completes the musical picture adding new high and low notes and fine color shadings all along the line.

New Garod-EA has power equivalent to 10 "B" Batteries. Power tubes 100 times more powerful than standard tubes. A Super Transformer that steps up the exhausted, steady flow of the house current to 450 volts. Neutrodyne, that silences all "squeals" and guarantees you the world's finest radio selectivity.

By eliminating the nuisance and expense of all batteries, eliminators, chargers and attachments, new-era Garod achieves the ultimate in operating simplicity. Nothing to do but switch on and tune.

Secret of Tone Quality
The ordinary radio is limited to notes from 300 to 3,000 vibrations per second. Half of the piano keyboard. Electric POWER reaches down 200 vibrations and up past the highest three notes of 4,133 vibrations to reproducing 6,000 NOW—extra keyboard reproduced by Electric POWER.

Before you invest in a new set, spend a few minutes comparing Electric POWER with battery-powered tone. New Garod-EA is the forerunner of a new epoch in radio reception. Perfectly amazing!

Garod Corporation, Belleville, N. J.

Ipana Plaza to Be in Kingston

Philippe Carlin, the WEAF announcer, whose voice usually accompanies the weekly broadcasts of the Ipana Troubadours on the WEAF chain, has created Ipana Plaza, that great imaginary amphitheatre of the air, wherein thousands of people all over the northeastern quarter of the United States gather each Wednesday evening, from nine to nine-thirty, some to dance and others to quietly enjoy the tuneful melodies dispensed by the Ipana Troubadours. His colorful descriptions of this beautiful place add much to the enjoyment of this half hour of brilliant entertainment. If you are not already a regular attendant at Ipana Plaza, tune in tonight and join the happy throng.

On Armistice night, November 11, at the Kingston armory, Ipana Plaza will become a reality for the people of Kingston and vicinity. On that evening the spacious drill shed will be gayly decorated for the eighth annual Victory Ball of Kingston Post No. 150, American Legion, and this same orchestra, under the direction of S. C. Lamm, their regular leader, will charm the hundreds of lovers of good music and the dancers who will be assembled there on that occasion.

LAST NIGHT on THE RADIO

Reception last night was good, not only from nearby stations, but from afar. One of the treats was the chimes from WOC, Davenport, Iowa, from 6:45 to 7. WJAR kindly refrained from going on the air until 7. WJAR has spoiled reception from WOC by jumping its wave length.

A fine example of courtesy is shown by WHT, 400 meters, which changes to 238 meters during a portion of the evening in order that fans may hear WHAS, which also uses 400 meters.

The prize fights from WNYC were received clearly and with good volume. WNYC, like the little girl in the rhyme, when it is good is very good indeed and when it is bad is horrid. Frequently it is horrid.

Senator Wadsworth's Albany speech, well worth hearing, was received without a flaw.

PLATTEKILL GRANGE MEETING AND ENTERTAINMENT

The regular meeting of Plattekill Grange, No. 923, was held at the hall on Saturday evening, October 9, with a good attendance. The program consisted of an original essay entitled "Ambition and Success," by Dorothy Powell, a duologue, "Mystery," by Mrs. Nelson Hodges and Mrs. Charles Everett and a very interesting poultry talk by John Chase, manager of Ulster County Poultry Farms. The program was interspersed with musical selections by the Harrison family of New Paltz. They also rendered some exhibition dances which were much enjoyed. Dancing was enjoyed at the close of the meeting. Coffee, cookies and cake were served by the refreshment committee.

At the next meeting members of Brookside Grange will be entertained. Clifford Hotelling, Gerow Wilkin and Wilmet Denniston have charge of the program for the evening.

The Grange accepted an invitation from the Rev. Mr. Taylor of Plattekill M. E. Church to attend services at that church on Sunday evening, October 30.

ANNUAL MEETING OF T. B. COMMITTEE

The annual meeting of the Ulster County Committee on the Prevention and Cure of Tuberculosis and Public Health will be held on Thursday evening, October 14, at 8 o'clock, at the office of the president, Judge Joseph M. Fowler, 293 Wall street.

Forty-Mile News

Vultures have the highest developed sense of smell of most all birds. They will scent carrion for 40 miles. It is said. In the country, where a vulture has not been seen for months maybe, a dead carcass of a hog or a calf sometimes will bring a 100 to the spot.

Idea Was Englishman's

Although the discovery is comparatively new to the public, the initial step in the transmission of pictures by electricity was made in 1824 by Alexander Bain, an English physicist. His plan was so basically correct that present-day experimentation is following his steps.

Etymological Note

There has been some discussion of how the name Miami originated. One version is that a Seminole buck told his lucky sweet back in 1890 that she was standing on land that would some day sell for \$40,000 a front foot, and her reply was: "My, am 'I'—Florida Times-Union.

FULLER'S EARTH

4 ounce Package

This product is fully equal to the finest English brand—famous for years for their highest quality—Fuller's Earth is used chiefly as an absorbent dusting powder. It is especially suitable for use on infants.

Kingston, N. Y.

Science Advances as Slowly Rising Spiral

There is nothing new under the sun. Science has developed. If not in a circle, at least in an ascending spiral, according to Dr. J. Newton Friend. It has continually followed earlier trends, but on increasingly higher planes, like a railway circling mountain top, he told members of the Royal Institution in a recent lecture in London.

Side by side with their pseudo-magic, the ancient priests of Chaldea and Egypt gradually accumulated a varied stock of scientific facts which were of invaluable assistance in enabling them to carry out simple experiments to impress the mob. They learned, for instance, that gases expand when heated, and utilized the fact in performing many a miracle—such as forcing out a libation through a tube concealed in the arm of the idol. Hero of Alexandria, an adroit Greek physician who flourished around 100 B. C., has left an account of many of these "miracles." Among other things he has described what is usually known as the first steam engine.

This consisted of a spherical boiler of water which, when heated gave off steam through several nozzles, causing it to revolve very much on the same principle as the pinwheel that delight little boys on the Fourth of July.

The Greeks were not interested in experiment. That was mental work fit only for slaves. Accordingly they produced the steam. Besides the well-known coevals of Aristotle and others there was Democritus, who developed an atomic theory of matter, the essential features of which were generally accepted until the time of Dalton, and Isotier Friend.

Alchemy did not come till the Christian era, but it lasted well on into the seventeenth century till the time of Boyle, one of the early philosophers. The alchemist and end-all of alchemy, transmutation of metals, after embracing a couple of centuries of disrepute, declared Isotier Friend, now engages the attention of the best scientific minds, since the investigation of radioactive elements shows that they have probably been undergoing spontaneous change into other elements since.

San's Energy Lost

The earth receives less than one-thousandth part of the energy poured out by the sun. The great part of it goes into space.

Science Advances as Slowly Rising Spiral

There is nothing new under the sun. Science has developed. If not in a circle, at least in an ascending spiral, according to Dr. J. Newton Friend. It has continually followed earlier trends, but on increasingly higher planes, like a railway circling mountain top, he told members of the Royal Institution in a recent lecture in London.

Side by side with their pseudo-magic, the ancient priests of Chaldea and Egypt gradually accumulated a varied stock of scientific facts which were of invaluable assistance in enabling them to carry out simple experiments to impress the mob. They learned, for instance, that gases expand when heated, and utilized the fact in performing many a miracle—such as forcing out a libation through a tube concealed in the arm of the idol. Hero of Alexandria, an adroit Greek physician who flourished around 100 B. C., has left an account of many of these "miracles." Among other things he has described what is usually known as the first steam engine.

This consisted of a spherical boiler of water which, when heated gave off steam through several nozzles, causing it to revolve very much on the same principle as the pinwheel that delight little boys on the Fourth of July.

The Greeks were not interested in experiment. That was mental work fit only for slaves. Accordingly they produced the steam. Besides the well-known coevals of Aristotle and others there was Democritus, who developed an atomic theory of matter, the essential features of which were generally accepted until the time of Dalton, and Isotier Friend.

Alchemy did not come till the Christian era, but it lasted well on into the seventeenth century till the time of Boyle, one of the early philosophers. The alchemist and end-all of alchemy, transmutation of metals, after embracing a couple of centuries of disrepute, declared Isotier Friend, now engages the attention of the best scientific minds, since the investigation of radioactive elements shows that they have probably been undergoing spontaneous change into other elements since.

San's Energy Lost

The earth receives less than one-thousandth part of the energy poured out by the sun. The great part of it goes into space.

Science Advances as Slowly Rising Spiral

There is nothing new under the sun. Science has developed. If not in a circle, at least in an ascending spiral, according to Dr. J. Newton Friend. It has continually followed earlier trends, but on increasingly higher planes, like a railway circling mountain top, he

Grid Coaches Find Cause for Worry

Name Not Meeting Expectations and Saturday's (Clashes May Furnish Some Surprising Results When College Teams Meet.

New York, Oct. 13 (AP)—Two of the east's most powerful eleven, Dartmouth and Yale, are finding much to worry about as their clash draws near. The Eli scrubs, forgetting for the moment they were facing one of the strongest offenses in the country, turned on the regulars and shot the vaunted attack full of holes. A fumble let the varsity score just one touchdown in a long afternoon of scrimmaging.

The Hanover Indians can't seem to get their line working this year in the manner that helped the 1926 eleven far on the road to a mythical championship. The forwards are not charging in unison and as a result coaches' brows are furrowed deep and Dartmouth linemen are bruised and sore from long drilling.

On the other hand, smiles are breaking out on the Harvard campus, where it had been feared that Crimson supporters would never be happy over their football favorites again. The reason: An awakening regular eleven yesterday

ripped five touchdowns through the scrubs and held them helpless when the scrubs in turn went to bat. An offensive of parts has been sadly lacking in two defeats on successive Saturdays and the defense has caused sophomores to write gloomy letters home. William and Mary may have a different sort of an offensive Saturday.

The powerful teams of Cornell, Colgate and Syracuse are paying a lot of attention to things that go by overhead. The line-crashing reputation at Syracuse have been ditched temporarily while the eleven men who are to face the Army Saturday learn something of stopping forward passing attacks. Captain Vic Hansen, whole and hearty again, will be in line Saturday against the cadets. Colgate, on the other hand, is drilling the regulars in fanning aerials that are hoped to blast the fond expectations of Pittsburgh when the clash comes Saturday. Gil Doble, the prince of pessimists, also is developing an air weapon to go along with one of the finest all around attacks the Ithacans ever boasted. Cornell has a date with Michigan State this week end, but upstate, Gil Doble is the only person worrying about it.

Jack Tar Sharkey Observed of Awarded Decision Walter Camp Day Over Stevedore

Harry Willis Disqualified for Foul in Thirteenth Round of Championship Fight—Year's Inactivity Has Had Effect on Negro—Sharkey in Better Form.

New York, Oct. 13 (AP)—Representatives of Uncle Sam's sea-going outfits stand today in supreme command of America's heavyweight fighting forces.

Less than a month after Gene Tunney, of the marine corps, battered Jack Dempsey into defeat in the rain at Philadelphia and won the heavyweight championship, Jack Sharkey of Boston, erstwhile Jack Tar, added to the triumph of seafaring men by decisive victory over Harry Willis, America's best known stevedore, before 45,000 spectators at Ebbets Field last night.

Fight Stopped for Foul.

The downfall of the famous Senegambian warrior, who for the seven years of Dempsey's reign challenged unceasingly for the outstanding crown of pugilism, came much like the overthrow of the champion he sought in vain to meet. Willis was a bleeding, almost helpless figure, stumbling about the ring in a fruitless effort to stem the rushing two-fisted attack of a 24-year-old youngster when the gray-haired Patsey Haley stepped between the fighters in the 13th round of the 15-round match and disqualified the negro for illegal use of a backhand blow.

Negro Warned Repeatedly.

The celebrated box toter of the docks had been warned repeatedly by referee Haley for unfair tactics, frolicking holding in the clinches, whipping of his glove backward across Sharkey's face, and Willis's old trick of holding with his left hand while he pounded away at the body with his right. All had brought their warnings. When the negro again swept the back of his glove over the Boston boy's eyes, Haley stepped between the battlers and waved Willis to his corner and to defeat that meant the end of all championship hopes.

Slow Through Inactivity.

But marring of the bout by disqualification could take none of the credit of victory from the sensational youth from New England. Willis, showing none of his former aggressiveness, and slow from a year of ring inactivity, was smashed and battered about the ring from the very start under the fusillade of an unerring two-fisted attack. From the fourth round on, the negro fought purely on the defensive as the sailor poured salvo after salvo into the battered face and bruised body. At the close blood spurted from a savage gash over Willis's right eye, from cuts about his nose and mouth, and his left eye was nearly closed.

Winner 24 Years Old.

The sailor from the Hub, who was born Joseph Paul Cuscos in Birmingham, N. Y., 24 years ago, conceded 26½ pounds in weight to his gigantic rival, but nothing in gameness. Sharkey threw his 188 pounds at the negro from the tap of the gong in the first round, ripping smashes to the head and body with both hands that landed almost at will.

MYSTICS AND TIGERS WIN ON IMMANUEL ALLEYS

The Immanuel Bowling League swung into action Monday night when the Mystics took two of three games from the Crescents, and the Tigers two of three from the Emeralds. E. Studt of the Crescents had high single game score and A. Studt of the Mystics had high average for the evening.

Basketball Star Operates Gas Tank

Sees Brighter Future in Handling Gasoline Than in Shooting Balls for Professional Teams—His Greatest Basketball Feat.

Addison, N. Y., Oct. 13 (AP)—A star of the basketball court is operating a filling station here, and hands and eyes that once co-ordinated in shooting a ball through a mesh-hung hoop now are engaged in directing a hose nozzle into gasoline tank openings.

He is Francis "Tank" Edwards, a native of Addison, who succeeded "Bucky" Harris on the Pittston, Pa., five when the manager of the Washington Senators, then a court star, left Pittston for his initial tryout in a big league camp. Edwards sees a brighter future in handling gasoline than in tossing basketballs for professional teams, but he keeps his hand in the game by coaching a nearby fire.

Edwards holds a sectional, if not a world, record in professional basketball by making 27 field goals in a game between the Addison Mohawks and the Corning Orioles a few years ago. Later he dropped in 14 consecutive free throws in a game with the Shepard Electric team, of Montour Falls.

Perhaps his greatest feat was accomplished at a time when he was spending hours daily in perfecting his game, and training himself to make one-hand shots on a catty proposition. He was working out on the second floor of the Addison town hall and had just dropped a left handed toss through the ring from the center of the court. An onlooker had remarked that such shots "come once in a hundred years." Edwards walked back to the center of the court, made eight consecutive baskets with his left hand, eight more with his right and quit the floor.

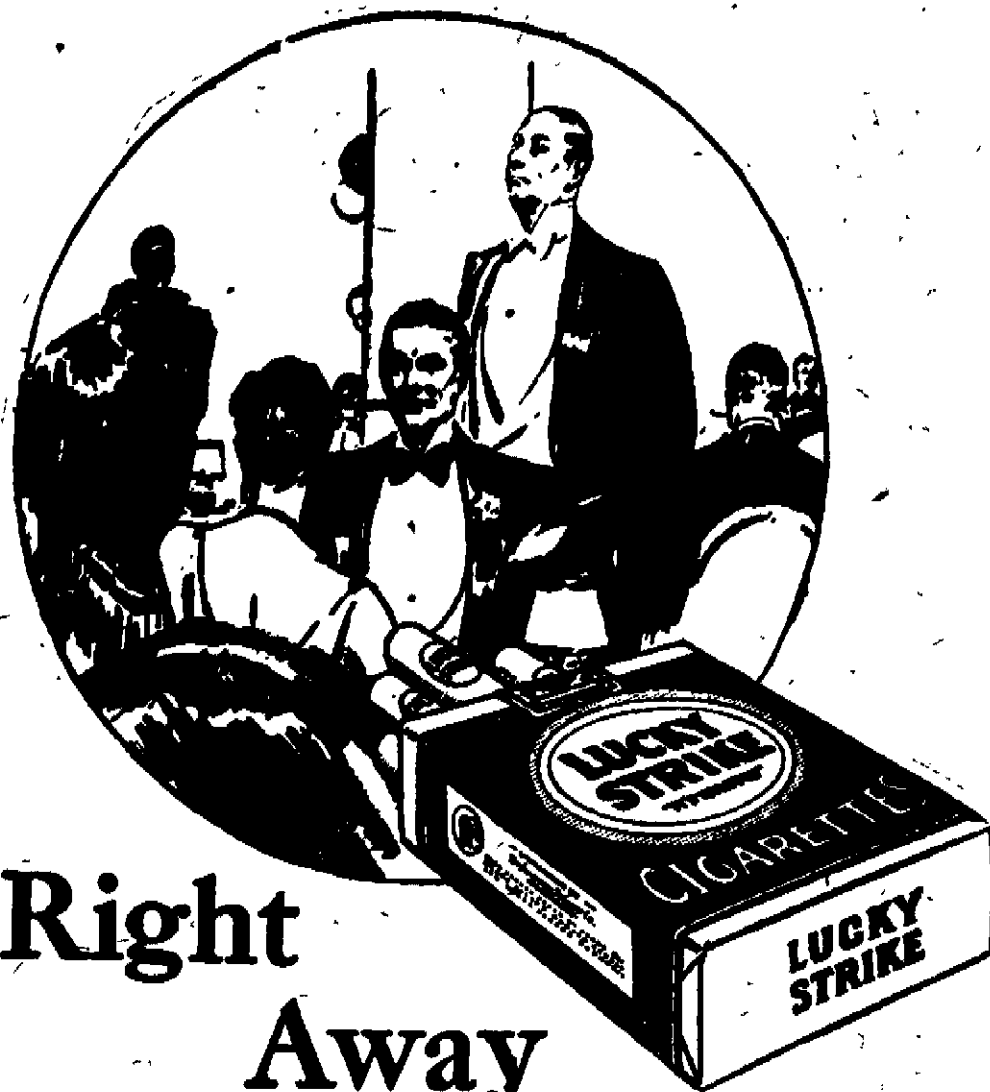

Edwards played with the Camp Dix team during the World War previous to going overseas, but has not been much in the game since that time. Last winter, however, although not having had a basketball in his hands for several seasons, he found himself in the lineup of the "Beverport Bruins."

Right Away

One advantage in Lucky Strikes is that you can immediately tell how different they are from other cigarettes.

You realize that they offer the finest Turkish and domestic tobaccos,

properly aged and perfectly blended—and something more.

That something is toasting—a costly added process, an added expense to us.

Lucky Strikes offer:

1. **Finer Flavor.** Toasting for 45 minutes develops the hidden flavors of the world's finest Turkish and domestic tobaccos.
2. **Smoothness.** Toasting for 45 minutes removes all "bite" and harshness, hence never any throat irritation.
3. **Freshness.** Then the tobacco is suddenly chilled. This seals the flavor in and insures constant freshness.

Thus the toasting process is an addition. It adds a unique and distinct improvement to a cigarette that has already been made from the finest Turkish and domestic tobaccos. It is the reason millions prefer Lucky Strikes.

Mother Says Tanlac Is Best Remedy in World

Suffering from Headaches, Stomach Trouble, High Blood Pressure, Neuritis and Nervousness, Buffalo Woman Recovers Lost Health. Thanks Tanlac

The remarkable experience of Mrs. Marion Grimes, 1075 Grant Street, Buffalo, N. Y., is the experience of thousands of others who after years of intense suffering have found grateful relief and new strength in this wonderful tonic and remedy.

Pain took its high toll and Mrs. Grimes found herself on the verge of becoming an invalid—her body racked with pain, unable to rest without suffering from indigestion and constipation, bothered by drowsy spells that made it dangerous for her to go out on the street, too weak to do her housework. Neuritis in right shoulder and back pinned her to the bed for 8 months.

Mrs. Grimes says: "Long days of anguish and tormenting pain that I tried to hide with a mask, followed about six weeks. Thought of food no longer. I ate very little and became so weak and run-down that I couldn't do my housework."

"I tried everything I could. Waited, waited. Then my daughter suggested Tanlac. What a wonderful daughter she is! For Tanlac saved me."

"Pain vanished. I began to sleep well and get up in the morning refreshed. I took on weight and felt stronger. Blue spots caused by high blood pressure disappeared from my face. Again I feel young. Tanlac is the best remedy in the world."

Benefit by Mrs. Grimes' experience. Let this marvelous tonic made from roots, herbs and berries according to the famous Tanlac formula, rebuild your run-down body, drive out pain and poison, give you robust health.

Results after taking the first bottle will amaze you. Ask your druggist for Tanlac—today! More than 40 million bottles sold.

land-grasses disappeared from my face. Again I feel young. Tanlac is the best remedy in the world."

Missionary Union Of Ulster Classis

The annual meeting of the Women's Missionary Union of the Classis of Ulster will be held on Thursday in the Reformed Church of the Comforter on Wynkoop Place, with sessions in the morning and afternoon.

Following is the program:

Morning Session.
10:00—Organ Prelude.
Convention called to order by the president, Mrs. Marcus A. Wood.
Appointment of committees.
Hymn 1.
Devotional exercises led by Mrs. C. V. W. Bedford.
Prayer, the Rev. W. P. Snow.
Address of welcome, Mrs. George Shufeldt.
Response, Miss Mary Osterhout of Flatbush.
Secretary's report.
Treasurer's report.
Hymn 752.
11:00—Address, Kentucky Mountain Work, by Mrs. John Y. Brock.
Hymn 755.
11:40—Address, Work in Japan, by Miss Jennie Pieters.
12:15—Adjournment.
Lunch served by Entertaining Auxiliary.
Blessing asked by all singing, Lord Mene Dextero.
Afternoon Session.
1:30—Executive Meeting.
Organ Prelude.
1:45—Convention called to order by the President.
Hymn 757.
Prayer for Our Missionaries and Their Work, the Rev. H. S. Van Wort.
2:00—Address, "Our Country, God's Country," Mrs. Edward H. Maynard, President of the Board of Domestic Missions.
Offering.
Hymn 805.
Solo, Miss Maud Weaver.
3:00—Address, Miss Ellen P. Cobb, Secretary of the Board of Foreign Missions.
Hymn 805.
Report of Resolutions Committee.
Report of Place Committee.
Benediction.
The Classis committee is composed of Mrs. Edgar Ellsworth, Miss Ellen Van Slyke and Mrs. Charles Smith.

Seems Writers Have Been Unjust to Jehu

The fact that Murray's dictionary states that the furious driving of Jehu has provided the English language with a noun, an adjective and a verb, has moved an erudite person to make the devastating discovery that Jehu did not drive rapidly, much less furiously.

The Hebrew, it is said, ought to have been translated "driveth to meditation," and it appears, therefore, that Jehu was named for his deterring driving, the exact opposite of the general belief.

As this view seems to be supported by what is known of Jehu's general character, it will be interesting (says an English paper) to know whether future editions of the dictionary will contain a note explaining that the meanings attached to the use of his name in the English language are entirely unfair to him.

What Is Pathology?

Logos is really the Greek for a word or discourse, and so came to stand for science, and all our "ologies" are sciences of something or other. In the same language, "pathos" stood for suffering, and so, in time, for disease; thus pathology really means the study or science of disease.

In one way, therefore, we can say that since every doctor is interested in disease, he must be a pathologist—and indeed as a student he had to take his course in the subject—but actually the term has become narrowed down to certain aspects of disease. It has, for instance, in practice nothing to do with the cure of disease or with its treatment, but confines itself purely to the scientific aspects. The pathologist, in fact, the research worker of disease.

We've Noticed It, Too

Often when you think you are losing, you are winning, and when you think you are winning you are losing. They will tell the story, too—Waterbury Standard.

COLDS THAT DEVELOP INTO PNEUMONIA

Periodic coughs and colds lead to serious trouble. You can stay that way with Greenmount, an invigorating, refreshing, pleasant to take. Greenmount is a new medical discovery with two-fold action: it soothes and breaks the inflamed membranes and inhibits germ growth.

Of all known drugs, cod liver is recognized by high medical authorities as one of the greatest healing agencies for persistent coughs and colds and other forms of throat troubles. Greenmount contains, in addition to cod liver, other healing elements which soothe and heal the inflamed membranes and stop the irritation and inflammation, while the cod liver goes on to the stomach, is absorbed into the blood, checks the start of the trouble and checks the growth of the germs.

Greenmount is particularly satisfactory in the treatment of persistent coughs and colds, bronchitis, pneumonia, and other forms of respiratory diseases and is especially for building up the system after colds or flu. Highly recommended if any cough or cold is neglected after taking according to directions. Ask your druggist. (adv.)

U. S. SET TO FIGHT MATERNAL MORTALITY

High Death Rate Speeds Bureau's Plans

Washington.—A national program for the prevention of maternal mortality and morbidity throughout the United States is outlined by the children's bureau of the United States Department of Labor in a report on maternal mortality.

This report, the work of Dr. Robert Morris Woodbury, formerly director of statistical research for the children's bureau, brings together and analyzes all available material, both American and foreign, on deaths of mothers during childbirth, and is considered one of the most important pieces of recent research in the field of the bureau's work. Children's bureau officials feel that it indicates the necessary emphasis during the coming decade in the effort to reduce deaths among both babies and mothers.

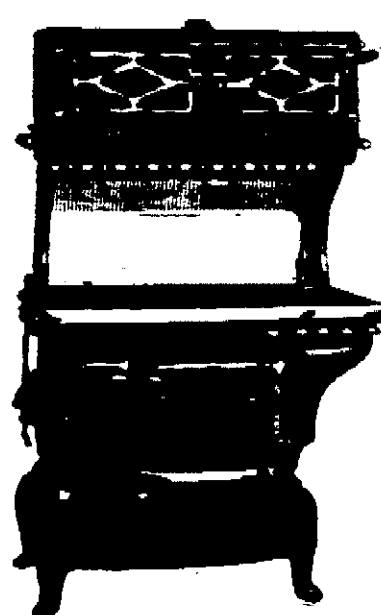

Mortality Rate High.
Maternal mortality rates in the United States are today among the highest in the civilized world, and but a slight decrease in these rates has occurred since the beginning of the present century. Doctor Woodbury's report states. The significance of these facts from a national point of view is found not only in the loss which this means of the lives of women, but also in the far-reaching effect of maternal mortality on the infant death rate.

A very considerable proportion of all deaths of infants under one year of age, Doctor Woodbury points out, "occur during the first month of life from causes which have their origin in the care and condition of mothers during pregnancy and confinement. In the United States as a whole it may be estimated that approximately 100,000 deaths of infants under one month of age occur every year. Reduction in the mortality from these causes depends upon improvement and extension of facilities for prenatal, confinement and postnatal care. It may also be estimated that at least 100,000 stillbirths occur each year. The same measures which will safeguard the lives and health of mothers during pregnancy and labor will also tend to reduce the stillbirth and neonatal mortality rates."

Doctor Woodbury estimates the total annual number of maternal deaths in the United States on the basis of 1921 birth-registration area statistics to be 14,821. However, a careful survey of sources of error is convincing him to the conclusion that the true number of maternal deaths is probably as much as 15 per cent in excess of those reported, making an estimated yearly death toll of more than 17,000 women. The maternal mortality rate in 1921 was 4.8 per 1,000 live births. The provincial 1924 rate was 6.5.

Poorly Trained Doctors.
As with infant mortality also, poverty is found to be an important factor in maternal death rates. There is considerable evidence that the high rate of maternal deaths is due to lack of proper facilities and adequate care for the poor mother. Color and nationality are also important factors in the maternal mortality. In the birth-regis-

Ideal Dream to Transform Slums

"Magic Wand" By Which Change May Be Made in New York's East Side Is \$100,000,000 Annually. Contributed by Public-Spirited Citizens.

New York, Oct. 13 (AP).—A vision of a lower East Side without slums, and their "breeding places of disease, vice and crime," wiped from the map, is moving toward realization in the minds of philanthropists, architects and city officials.

August Hecksher, philanthropist, who was appointed by Mayor Walker to study European methods of housing in congested districts, is the leading spirit in the movement. By the fulfillment of tentative plans which he announced today and which constitute one of the most ambitious housing programs ever projected in this country, thousands of modern well-ventilated and sunlight apartment houses would spring up in the places of squalid, cheerless tenement houses that now line the dingy streets for miles and in which live approximately 1,000,000 people.

The "magic wand" by which it is hoped to bring about the transformation will be \$100,000,000 annually which the leaders of the movement expect to raise from public-spirited citizens, the city and the state. With this sum available annually, these leaders believe the tenements could be eliminated and replaced by modern apartment buildings within ten or fifteen years. Prominent people already have given assurance of their aid, Mr. Hecksher reported.

Termining the slums of New York and other great American cities "a disgrace to these cities and to the nation," Mr. Hecksher pointed out that progress has left little impression on the lower East Side. There is one area, of little more than a square mile, where more than 400,000 people live. One group of tenements was condemned in 1885 as unfit for habitation, but they are still occupied.

THE JOINERS.

News of Interest to Members of Fraternal Societies.

GRETEM—In this city, at residence, 145 Clinton avenue, October 13, 1926, Amelia S., wife of John A. Gretem, and mother of Mildred Torbett.

Funeral private, interment in the Hoboken Cemetery, Union Hill, N. J.

MONROE—Suddenly at East Kingston, October 11, 1926, Thomas Jefferson Monroe, aged 50 years.

Funeral from the residence of his daughter, Mrs. Margaret Brown at Brigham's Brickyard, Thursday, October 14, at 2:30 p. m. and at the Franklin Street M. E. Zion Church at 3:00 p. m. Relatives and friends invited. Interment in the family plot in Mt. Zion Cemetery.

Financial and Commercial

New York, Oct. 13 (AP).—Stock prices turned upward today as the market appeared to have reached resistance levels beyond which the hammering tactics of bear traders were unavailing. The influence of constructive trade developments which took place over the holiday counteracted the maintenance of relatively stiff money rates and the renewed calling of bank loans.

Traders of the nervousness which accompanied the recent decline were still evident, however, as a firm opening was followed by a bear drive against General Motors which carried it to the lowest point of the current movement. The rest of the market withstood selling pressure and later responded to a renewed demand for various motor, food, public utility, mercantile, copper, railroad equipment and farm implement shares.

The advance was stimulated by a sustained demand for high grade rail stock, including Nickel Plate, Chesapeake and Ohio, Atchafalaya, Union Pacific, New York Central and Lackawanna, Colorado and Southern, the highest priced issue, soared 11 points to 54 on accumulation variously attributed to buying for the Burlington and to reports that dividends would soon be resumed.

Declaration of a \$1 extra dividend on Woolworth shares helped to revive interest in the merchandising shares, while Timken Roller Bearing displayed independent strength on reports of railway equipment contracts.

Quotations given by C. D. Halsey & Co., 27 William street, New York city, branch office, Warren Building, 260-62 Fair street, Kingston, N. Y.

Follows Auto Victim; Finds Her Own Child

New York—Thinking she might identify as a child of her neighborhood a girl she saw run down by an automobile, Mrs. Laura Burns followed the car that hit the girl and which carried her to Bellevue hospital.

When she looked at the child on the cot, she screamed and fell to the floor. Her own daughter, Agnes, six, lay there.

Hospital attendants removed the mother and sent her home when she had revived sufficiently. They did not inform her that before her arrival at the hospital the child had died.

Small Flyer Killed

Atlanta, Ga.—Born from his parents by a gust of wind, Jimmy Gibson, street flyer, fell 600 feet to death in a hole at Lakeside, on an unrecorded report here.

Yanks Again to Go Over the Top

Twenty-eight Ships Will Convey American Legion Members to Europe Next Year for Annual Convention in Paris.

Philadelphia, Oct. 13 (AP).—The Yanks are going over again!

More than 30,000 men and women, who did their "bit" during the World War, will shove off on twenty-eight ships next September to hold the American Legion's ninth annual convention in Paris.

The "second A. E. F." will sail from Montreal, Boston, New York, Hampton Roads, Charleston, Jacksonville and Galveston or Houston, with New Orleans a port of call.

The Legionnaires will lead the armada of legionnaires as the official flagship.

The convention will meet September 19 and continue until the 23rd. When the delegates return to the United States they will reconvene in New York October 18 and transact such business as comes before it.

Need of an all-pervading faith in the essential honesty of men, was stressed in a message received today from William Green, president of the American Federation of Labor, at the American Legion convention. "The American Legion has a very special place in the memories of all citizens because it calls to mind a great national emergency and the splendid response of our citizenry in manifold service," he said. "Your organization represents one very distinguished kind of service through which our nation met that emergency."

"The lasting lesson of that terrible experience is to my mind the necessity of considering all our problems with the belief that a solution can be found through the combined wisdom, experience and good will of all concerned."

Anglo-Catholic Congress Opens

Milwaukee, Wis., Oct. 13 (AP).—With their informal opening characterized by harmony, the Anglo-Catholic Congress delegates today prepared for the celebration of a solemn high Mass within the shadowy confines of All-Saints Cathedral, to open the sessions officially.

The celebrant for the high Mass was to be the Rev. Seiden P. Delany of New York, while the Right Rev. Charles Fiske, bishop of Central New York, was chosen to deliver the sermon. The Most Rev. John Gardner Murray, presiding bishop of the Episcopal Church and president of the National Council, extended a message of greeting to the congress, at the informal opening last night.

Frederic Cook Moorehouse, editor of the Living Church, defended the presiding bishop in his recent attacks by churchmen in the east, especially those who urged him not to attend the sessions of the congress.

Odds and Ends

The fish pond committee of the Clinton Avenue M. E. Church will hold a meeting Thursday evening at 8:30, at the close of prayer service.

There will be a special meeting of the Ladies' Auxiliary of Welner Hose Co., No. 6, on Thursday evening, October 14. All members are requested to be present.

At the Franklin Street Zion Church this evening at 8 o'clock there will be a social gathering of all the members, including the Sunday school and friends. Everybody is asked to be on time.

About the Folks

Elizabeth M. Haley is ill at her home, 83 West Union street.

Mrs. H. S. Woolsey and daughter, Nellie, are spending the week at Lake George.

Mrs. H. F. Kernan of 85 Main street on Monday accompanied Miss Gertrude Canning, R. N., to the Champlain Valley Hospital at Plattsburgh, where Miss Canning will undergo an operation.

It Never Fails

I was about to start out on my first day of hiking at Glacier park when Bert stopped me. Bert is one of those fancy cowboys who "coot" "dude" over the Glacier trails, and he appears to enjoy it.

You gotta a map an' compass? he asked, and I assured him I had.

"Well, hey you gotta deck of playin' cards?" he persisted.

"Why a deck of playing cards?" I asked.

"Always carry a deck with you, son, and whenever you get lost an' find yourself all alone in the wilderness set down an' start a game of solitaire. There's just sure to be some darn fool pop up an' look over your shoulder an' tell you what to do next."—Chicago Tribune.

Whole Meat Like Real

The whole is a warm-blooded mammal and its flesh is exactly similar to that with but slightly coarser texture. The canned product has no city taste and it is cheap, palatable, and easily digested. The analysis of canned whole meat has shown that its food value may be compared with that of round steak. Some time ago it was estimated that 100,000,000 pounds of whole meat could be supplied the people of the American continent from the British Columbia coast annually at a price of about 25¢ cents a pound.

Society Notes

Thomas Henry Lawyer of the Brooklyn Navy Yard and Julia Kearney were married at the manse of the Fair Street Reformed Church by Dr. F. B. Seeley on Tuesday, October 12.

Little Gardens Club Meeting.

The second October meeting of the Little Gardens Club has been postponed to Friday, October 22, when the members will meet with Mrs. Joel Brink at Lake Katrine. As officers for the ensuing year will be chosen at this meeting and other matters of importance will come up, a full attendance is urged.

D. A. R. Chapter Day.

October 16, "Chapter Day" for Willwyck Chapter, D. A. R., will be observed on Saturday afternoon at the Chapter House. Open House will be observed and a social afternoon will be made particularly pleasant for all who attend, and a large attendance is hoped for. A "Thank Offering" will be taken, the funds therefrom to go toward the fund for repairs to the Chapter House.

Donovan-Bergen.

Mrs. Frank O'Reilly of No. 204 West Chestnut street announces the marriage of her sister, Miss Kathryn Angela Bergen, to William F. Donovan of No. 578 Delaware avenue, at St. Patrick's Church, Newburgh, on Tuesday morning. The ceremony was performed by the Rev. Father Connelly. Miss Rosa E. Bergen was bridesmaid and Leo Clare was best man. Following the ceremony Mr. and Mrs. Donovan left on a motor trip to Canada.

Hightmyer-Young.

George B. Hightmyer of Gilboa and Miss Mildred C. Young of Waukegan, formerly of Saugerties, were married at the parsonage of the Saugerties Congregational Church on Saturday, October 9, by the Rev. T. L. Leverett. The attendants were Miss Laura Mae Young, a sister of the bride, and Verge N. Hightmyer, a brother of the groom. Mr. and Mrs. Hightmyer will make their home in Waukegan, where the groom is employed by the McLauren & Jones Paper Company.

Saunders-Snyder.

A very pretty wedding took place at the Rev. King's residence, 89 Newkirk avenue on Monday evening, October 11, when Miss Florence Snyder of 113 Abbot street became the bride of Murray Saunders of Petersburg, Virginia. The bride was charmingly attired in powder blue crepe de chine with picture hat to match. She was attended by Miss Viola Anderson, who wore a honeydew gown with picture hat to match. After the ceremony a dinner was served by Mr. and Mrs. Abram Anderson of 113 Abbot street. Frisco's Colored Ramblers of Newburgh played during the dinner. There were many beautiful wedding presents presented to the bride and groom with good wishes. They will reside at 113 Abbot street.

Cole-Rahder.

A very pretty autumn wedding took place on Tuesday, October 12, at the home of the bride's parents, Mr. and Mrs. DeWitt Cole, of Hurley avenue, when their daughter, Phoebe, was united in marriage to William A. Rahder of this city. The Rev. Dr. Seeley officiated. The home was beautifully decorated with autumn leaves and flowers. The bride and bridesmaids were charmingly attired. Immediately after the wedding ceremony the son of Mr. and Mrs. Clifford Cole of Marletown was christened and the guests, all of whom were of the immediate families, had a gala time until late hour. The bride and groom are on their honeymoon to Atlantic City and Philadelphia.

Siegler-Levine.

Miss Dorothy Levine, daughter of Mr. and Mrs. Samuel Levine of this city, and Irving Siegler, son of Mr. and Mrs. Bernard Siegler of Newburgh, were united in marriage at the Jewish Community Center on lower Broadway on Sunday evening at 8 o'clock by Rabbi Kaplovitz. The bride was attended by Miss Esther Siegler, a sister of the groom, as maid of honor. The bridesmaids were Lucille Toback and Fay Siegler of Newburgh and Anna Black of Kingston. The best man was Maurice Levine of Kingston. The flower girl was Janet Perlman, niece of the groom. The bride was gown in white bridal satin trimmed with touches of lace and georgette. Her veil was of Spanish lace in cap shape, held in place with sprays of lilies of the valley. She wore white satin slippers and stockings of the same shade and her bridal bouquet was of pink carnations. Miss Toback wore a gown of blue green with slippers and stockings to match; Miss Fay Siegler was dressed in white with slippers and stockings of pale pink, while Miss Black wore peach color with silver slippers and stockings. All carried arm bouquets of pink carnations. During the ceremony "O Promise Me" was sung by a cousin of the bride. Following the ceremony there was a reception and a collation was served. Dancing followed. Early in the evening Mr. and Mrs. Siegler left for Atlantic City where they will spend their honeymoon. Upon their return they will make their home on Williams street, Newburgh. The groom is connected with his father, Bernard Siegler, in the wholesale stationery business in that city. The couple received a large number of gifts from their many friends.

Newburgh Folks Visit Relatives.

Tuesday a party of Newburgh people motored to Rock Camp at Markle Heights on the Ashokan reservoir and enjoyed a bonfire dinner, returning to Newburgh by way of Ellenville, Middletown and Montgomery. Those in the party were John Sanford, P. J. Clark, George Miller, Mr. and Mrs. Brink and Herman Leifheit and family.

ABORICULTURE

Hot trees do best indoors.

Ambushes, of course, are for dark places.

Weeping willows should be set out in tiers.

Family trees flourish best in exclusive sections.

Not trees are appropriate for insane asylums grounds.

Shoe trees, to yield galoshes, must be grafted with the rubber plant.—Boston Transcript.

MEKE MUSINGS

A self-made man makes his mark and in the olden days of illiteracy he had to.

Don't make the same mistake twice. Make another one. Variety is the spice of mistakes.

Possession of a motor car enables some to revive their village practice of running to a fire.

In order to highly entertain in conversation, you generally have to say things you oughtn't to.

Who wants a friendship that isn't kind to one's faults? That's what friendship consists in.

If one doesn't care so much for what life has to offer, one can be wondrously independent and courageous.

There are optimists and pessimists; and now allowance is made for a middle ground, occupied by the enormous multitude who accept life as they find it.

In sympathizing with the world one has to get up a little more steam to sympathize with the smart alecks, but they also need an understanding sympathy, poor things.

PUNGENT "PARS"

Much happiness never goes with much money.

It's more to your credit to help a man before he is down than after.

How fortunate that the things we actually need are not very hard to get.

Truth can be told in but one way, while a lie can be told with a dozen variations.

Folks who board want to keep house, and folks who keep house want to board.

You can accurately judge a community by what it does with its ashes and tomato cans.

Our best education comes from associating with folks who know things that we don't.

Bez Heck says: "All the progress made in the world has been made by some one raisin' hell at the right time."—Bert Moses in Detroit Free Press.

MANICURIST MUSINGS

I guess that new fellow I met is a highbrow. He thinks tabloids is a patent medicine.

Paw's bought himself an encyclopedia at a dollar a week an' all he ever looks at is th' article on distills'.

My kid sister an' her gal friend is both after th' same fellow. It's a close race; sort of neckin' an' neckin', you might say.

Rosie, at th' next table, went to th' beach last week-end an' wore her new bathin' suit. Her hips is awful sunburned, she says.

Ever since gran'maw got her boyish bob, I steer my bean clear of her. I can't stand competition from an old head with a young haircut.

My kid brother says to me, "You can't keep a good man down," an' I says to him, "Your trouble is different. Nobody can get you up!"—James Kevin McGinniss in Collier's.

PHILOSOPHICAL

Silence is sweeter than speech.—Craik.

No really great man ever thought himself so.—Hawthorne.

Rise with the lark, and with the lark to bed.—Hurd.

Better a healthy peasant than a sickly king.—Ferdinand III.

Accidents will occur in the best regulated families.—Dickens.

Be that knows when to speak knows when to be silent.—Archimedes.

An evil-doer differs from an evil-deed only in the want of opportunity.—Quintilian.

I am not concerned that I am not known; I seek to be worthy to be known.—Confucius.

As We Thought

A New York man has invented a hat which is secured to the head by means of suction. Judging by the flimsy American detective has always worn this sort, so he is the only man who doesn't uncover when the body is found.—London Opinion.

Swimmer Here For Brief Rest

Clad Only in Automobile Grease and a Cap Mrs. Schoemmel Will Resume Swim at 7 o'clock and Spend Night in Kingston.

Mrs. Charlotte Moore Schoemmel, the New York woman life guard who is attempting to swim from Albany to New York, after spending Tuesday night at Saugerties, plunged into the waters of the Hudson river four miles above Saugerties at 8:30 o'clock this morning and swam to within three and a half miles of Kingston when she again left the water at 12:20 o'clock this afternoon and climbed aboard the motor cruiser, Idle Hour, which ran into the Rondout creek and berthed at the old Abbey dock in the rear of the old coal pockets.

Mrs. Schoemmel had covered 47 1/2 miles of her journey at the time she left the water this afternoon in 20 hours and two minutes, and expects to again take to the water at 7 o'clock tonight at the point where she left the Hudson river three and one-half miles above Kingston and swim to this city where she and party will spend the night at the West Shore Hotel.

She plans to again plunge into the water Thursday morning at 8 o'clock and hopes to reach Poughkeepsie before night.

Harry Seixas, her trainer, stated this afternoon that if she continued to cover the distance as she has the past few days she will cover the distance between Albany and New York in less than sixty-three hours.

WEDNESDAY, OCTOBER 13, 1926.

Sun rises, 6:12; sets, 5:20.
Weather, cloudy.

The temperature.

The lowest point reached by the
Freeman thermometer last night was
48 degrees. The highest point
reached up until noon today was 60
degrees.

Weather Forecast.

Washington, Oct. 13.—Eastern
New York: Partly cloudy with
showers in extreme south portion to-
night; fair and cooler tonight in
central and north portion; Thursday
fair and cooler; fresh southwest
shifting to north winds.

Van Bramer and Cashin
Acrobatic dance.....Miss Longtree
Charleston steps.....Entire Company
The program was enjoyed by
all was evidenced by the generous
applause that greeted each number.
Following the entertainment the
Kerhonkson ladies served refresh-
ments and a general sociable time
was enjoyed by all. Short talks
were given on the work of the Farm
and Home Bureau by Assemblyman
Millard Davis, Miss Nance and Mr.
Wigsten, and they dealt with the
work of their organization both past
and future.Tonight a similar meeting will be
held at the Grange Hall, Lake
Katrine, and it is hoped that a much
larger number of Kingston business
men will attend. Miss Mildred
Messinger will be the soloist tonight.NOTED SPEAKERS FOR
DAIRMEN'S CELEBRATION.Word has just been received that
John J. Dillon, owner and publisher
of the "Rural New Yorker," will
speak at the anniversary celebration
of the 1916 milk strike to be held at
Middletown Fair Grounds, Saturday,
October 16, and also John Y. Gerow,
first president of the Dairymen's
League, will speak.Pistol Practice for Artillerymen.
Battery A, 156th Field Artillery
members are ordered to be present at
the armory at 8 o'clock Thursday
morning in uniform for pistol prac-
tice at the Mutton Hollow Range.
Transportation and lunch will be fur-
nished. The whole company will not
be detained to return to the armory
in a body but as the firing is com-
pleted the shooters will be transport-
ed to headquarters.

WARNER BROS.
present
**"ACROSS the
PACIFIC"**
with
Monte Blue

A great story of the days of the Spanish American War. A photo-
play packed full of action, suspense and thrills. Yes, there is a
hero, heroine, villain and villainess. Come and be entertained by
MONTE BLUE. See him capture the rebel Aguinaldo.
WE KNOW YOU WILL LEAVE THE THEATRE SMILING.

Office.)

A EUGENE WAVE

Steam ON The Hair
THAT'S wherein the Eugene Method
of Permanent Waving differs from
the commonplace. It does not generate
scurf in the hair. It sprays steam on
the hair, instead of dry. The long lines
of the Eugene wave please the eye.
To gentlemen please the hair. Ask us
about it.

A SETH THOMAS CLOCK
will improve any
Room in your Home

LEADING decorators agree that no other article
will add more life and animation than a well
chosen clock. In rearranging the interior of your
home this Fall, consider a Seth Thomas. You will
find an excellent
variety in our com-
plete display.
